

7th Grade work in the event of school closing;

You will have to work on this yourself. You can use the internet as a resource. Look to you tube for videos of how to do these topics. This is a first for me, but we must continue to move forward

No dates will be associated with the assignments. It is assumed that the listed work will take about three weeks to complete. Read each section, study the examples, try them and then attempt the home work. Some of the answers are in the back, be sure to ck and see if you are getting them correct. If not, then go back, reread and try again. You may not finish all this, but make good progress.
